Articles

A chance to meet—Arthur Brown (a second time) **7**:26
Admixture answers (no 2) **8**:24
Aesthetics on the A3 **5**:29
Airport runway—'Concrete takes off at Bembridge' **10**:25
Alice Ottley School—Concrete marries brick **7**:30
Alkali-aggregate reaction in Great Britain—the present position **3**:24
Alkali-aggregate reaction in concrete—Capetown conference highlights practical problems **7**:16
Alkali reactions and concrete durability **8**:18
Alkali reactivity—Part 1 **10**:27
Alkali reactivity—Part 2 **11**:29
Alte-Oper restored **11**:12
Application of standard testing procedures for alkali reactivity—Part 1 **10**:27
Application of standard testing procedures for alkali reactivity—Part 2 **11**:29
Argoed Comprehensive School—CS Site Practice Award 1981 **10**:12
Arizona Bank Plaza building—Bank building rests on floating platform **6**:18
Artificial aggregate from domestic refuse **5**:25
Bahai Temple, Lake Michigan, USA **4**:20
Bank building rests on floating platform **6**:18
Barge—Design for a prestressed, **9**:34
Beam—post-tensioned—demolition of **9**:20
Blockwork in diaphragm wall construction **2**:16
Blockwork (slotted)—thermal properties of **7**:22
Brasilia concrete—21 today **5**:22
Breakthrough in truckmixer payload? **11**:17
Brick—concrete complements **12**:12
Bridge beams (precast) in Kuwait **7**:18
Bus depot—Motorway forms **2**:28
CGLI—Revised concrete technology qualifications **8**:28
CRCP by fixed form train at Stockport **12**:20
Camel racing grandstand—a concrete tent **8**:8
Canoe races—1981 **8**:16
Capetown conference highlights practical problems **7**:17
Chunnel Tunnel—a lost chance **10**:19
Cladding panels—fixing of **5**:38
Cold concrete's growing market **1**:32
A comment on BS 4466:1981 **11**:18
Computers and ready mixed concrete **12**:15
Concrete to drive and walk on **4**:32
Concrete durability and alkali reactions **8**:18
Concrete in historic surroundings **3**:12
Concrete house faces up to a sea environment **12**:25
Concrete marries brick at Alice Ottley School **7**:30
Concrete In the Middle East (2)—Rates of deterioration **9**:12
Concrete In the Middle East—Crack mapping for investigation **5**:12
Concrete In the Middle East—(3) deterioration related to chloride ingress **11**:22
Concrete—right on the site **8**:25
Concrete Society policy for the Eighties **6**:15
Concrete Society Site Practice Award 1981 **10**:12
Concrete in South America's smallest republic **7**:12
Concrete 'takes off' at Bembridge **10**:25
Concrete technology workshop **2**:39
Controlled demolition of a post-tensioned beam **9**:20
Construction industry and research **6**:12
Cost effectiveness of construction plant **10**:14
Crack mapping for investigation of Middle East concrete **5**:12
Cryogenics—Cold concrete's growing market **1**:32
Cube failure—what next? **1**:37
Delta Project—grand finale for **1**:12
Deterioration (rates of) in Middle East **9**:12
Deterioration related to chloride ingress **11**:22
Demolition (controlled) of a post tensioned beam **9**:20
Demolition updating meeting **3**:29
Design for a prestressed barge **9**:34
Diaphragm wall construction—blockwork in **2**:16
Down with the boards (diving) at Weston-Super-Mare **12**:22
Duke University Hospital North: A hospital in harmony **2**:12
Dutch Delta—grand finale for **1**:12
Ferrocement—a structural material **1**:20
Flexural strengths—Influences on **2**:26
Finishing concrete—a view from the site **1**:17
Fixing cladding panels **5**:38
Flat roofs—a problem of thermal insulation **12**:26
Floating platform—bank building rests on **6**:18
Foamed concrete—structural applications of **2**:24
Frankfurt's Alte Oper **11**:12
Fresh concrete—getting up to date with **3**:30
Getting up to date with fresh concrete **3**:30
'Golden' concrete complements brick **12**:12
Grand finale for the Dutch Delta **1**:12
Grinding, past, present and future **10**:20
Guardian of the Roman shore **2**:14
High yield deformed reinforcing bar—a commentary on the performance of hot rolled and cold worked reinforcing steel bars—Part 1 **12**:28
A hospital in harmony **2**:12
Housing system in Middle East **2**:29
ICE 81 **4**:25
ICT Newsletter **8**:17
If in difficulty—shout **8**:14
Influences on flexural strength of concrete **2**:26
In situ concrete strength—Pull off test for **12**:23
Investigations by concrete technologists **5**:36
It couldn't be done today **4**:20
Kuwait 'hybrid' precast bridge beams **7**:18
LPG Storage—Prestressed concrete for **11**:14
Large pours **4**:31
Last chance for the Chunnel **10**:19
Let the taxman help you—to a pension **12**:21
Lightweight concrete in highway bridges **10**:24
Lilliput Town **3**:28
Limit state approach and the secondary dead load **9**:31
Materials Research Seminar **9**:30
Materials Steering Group **10**:24
Micro-computers for construction **10**:31
Middle East Concrete—Crack mapping for investigation **5**:12
Middle East Concrete (3)—deterioration related to chloride ingress **11**:22
Middle East Concrete (2)—Rates of deterioration **9**:12
Middle East housing system **2**:30
More random reflections **2**:27
Morning Glory spillway tower **6**:39
Motorway forms bus depot roof **2**:29

Northampton Tower 4:12
Old and New in London project 5:30
OPC/PFA concrete—strength variability of 6:33
PACT comes to London 6:37
Past, present and a future for grinding 10:20
Paved concrete train 6:27
Paving—CRCP by fixed form train at Stockport 12:20
PFA/OPC concrete—strength variability of 6:33
Prestressed concrete for pressurised LPG storage 11:14
Penetration resistance—Testing by 1:30
Plant, Cost effectiveness of 10:14
Precast bridge beams in Kuwait 7:18
Professor J Cornish's reflections 2:27
Pull-off test for in situ concrete strength 12:23
RAM operator of the Year 8:12
RC Beams—Simple charts for checking of 3:19
Rates of Deterioration—Middle East Concrete (2) 9:12
Ready Mixed concrete and the computer 12:15
Refuse as artificial aggregate 5:25
Reinforced concrete workshop 2:39
Reinforcing bars—high yield deformed 12:28
Research and the construction industry 6:12
Reviewing ICE 81 4:24
Revised concrete technology qualifications 8:28
Secondary dead load and the limit state approach 9:31
Simple charts for checking reinforced concrete beams 3:19
Strength variability of OPC/PFA concrete 6:33
Structural applications of foamed concrete 2:24
Tale of a tower 4:12
Testing by penetration resistance 1:30
Thermal insulation—Flat roofs and problems of 12:26
Thermal properties of slotted blockwork 7:22
Toronto's exciting structures 1:26
Towards better concrete 9:25
A town called Lilliput 3:28
Truckmixer—a breakthrough in payload 11:17
Uruguay—Concrete in South America's smallest republic 7:12
Vienna's better 'beton' 4:28
Weston-super-Mare—Down with the boards 12:22
